Release 3.1A John F. Collins, Biocomputing Research Unit. Copyright (c) 1993-1998 University of Edinburgh, U.K. Distribution rights by Oxford Molecular Ltd

Run on: MPsrch_pp protein - protein database search, using Smith-Waterman algorithm

Mon Aug 30 16:04:38 1999; MasPar time 14.67 Seconds 907.352 Million cell updates/sec

Tabular output not generated.

Description: Perfect Score: >US-09-120-044-3 (1-471) from US09120044.pep 3299

1 MANKAVNDFILAMNYDKKKL.....TISIWGTTLYPQVEDKVEND 471

Scoring table: PAM 150 Gap 11 Sequence:

77977 seqs, 28268293 residues

Post-processing: Minimum Match 0% Listing first 45 summaries

Database: swiss-prot37 1:swissprot

Statistics:

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Mean 51.760; Variance 98.133; scale 0.527

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               FUNCTION: SULFHYDRYL-ACTIVATED TOXIN. IS ABLE TO LYSE CHOLESTEROL CONTAINING MEMBRANES. CAN BE REVERSIBLY INACTIVATED BY OXIDATION. CHOLESTEROL IS THE RECEPTOR FOR THE BINDING OF THESE TOXINS TO EUKARYOTIC CELL MEMBRANES.
SIMILARITY: BELONGS TO THE THIOL-ACTIVATED CYTOLYSIN FAMILY.

-!- FUNCTION: SULFHYDRYL-ACTIVATED TOXIN. IS ABLE TO LYSE CHOLESTEROL CONTAINING MEMBRANES. CAN BE REVERSIBLY INACTIVATED BY OXIDATION. CHOLESTEROL IS THE RECEPTOR FOR THE BINDING OF THESE TOXINS TO EUKARYOTIC CELL MEMBRANES.
-!- SIMILARITY: BELONGS TO THE THIOL-ACTIVATED CYTOLYSIN FAMILY.

Statistics: Mean 49.610; Variance 95.041; scale 0.522

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
